

Analysys Mason GmbH, Bonn Company Presentation

Enter_Zukunft_IT

We inspire. Make a difference.

Analysys Mason acquired Allolio&Konrad Consulting GmbH in April 2020. Allolio&Konrad Partnerschaft was originally founded in 2003. Since then, we have mainly focused on consulting projects for the telecoms industry, but have expanded our remit into the utilities and finance sectors over the years. The company has grown consistently since 2003, evolving from 5 team members to a 50 people business and our team continues to grow. In December 2016, Allolio&Konrad Partnerschaft was acquired by Ericsson and traded under Allolio&Konrad Consulting GmbH. In July 2020, Analysys Mason GmbH became the new brand name for our German entity.

Most of our projects deal with innovations and new services. In daily business, the retirement of a service is often neglected. My favourite project to date involved planning a formal procedure to retire old services. It was fascinating to see how many dependencies need to be solved with users and suppliers before systems can be switched off. In my role on the project, I talked to all the different departments of our customer to find all dependencies, solutions and consolidate everything in one big picture.

Fabian Dornuf, Senior Consultant

One of my favourite projects was the implementation of a project management software tool for a UK client in different countries. From gathering the business needs to choosing the right tool and finally seeing the implementation and configuration through, I was able to work with an amazing international team throughout the whole process. As project lead, I connected human needs to technical requirements and was part of the company's journey towards changing their way of working. In my view, this is a great example of how new IT tools, when done right, can support the users and therefore generate real business value.

Clara Beutner, Manager

My favourite project involves faster internet for Germany. The challenge was to get everything under one roof, such as the data, the different organisational units of the customer, the Germany-wide planning and co-ordination, and the resolution of errors and challenges that occur. The fun and motivation within the team was very high and everyone was committed to the goal. I really appreciated this experience and the way it was handled.

Henry Beier, Manager

When I came back from paternity leave, a once-in-a-lifetime opportunity opened up: I was offered a data forensics project in a customer relationship department. The task was simple on paper: please help us to find the gaps in the data structure and identify inactive accounts in our huge, organically grown industrial-sized databases for many millions of private and corporate clients. Sifting through code, digging out mismatches and repairing the data structure evoked fond memories of my time in the university labs!

Cristian Neacsu, Manager

When asked to describe our culture, our team members use same words consistently.

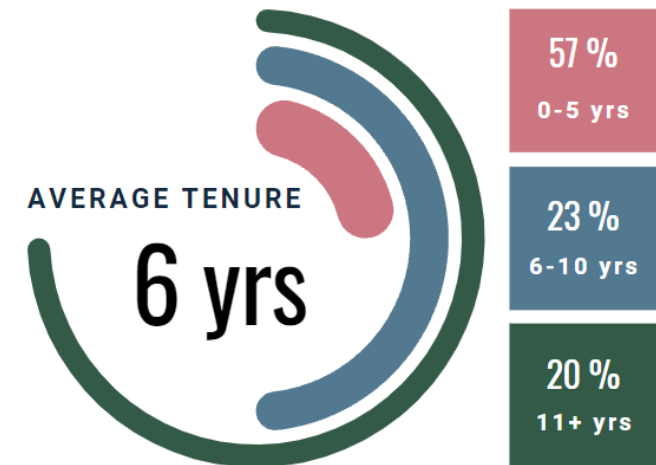

We measure success by customer satisfaction and not working hours. We understand a functioning work-life-balance is the foundation of a long-term relationship.

We offer outstanding development opportunities. While being engaged on a project, you will have leeway for decisions and of course be in close contact with our customers.

We are aware of the wishes, interests and personal circumstances of our team members and accommodate those as best as we can.

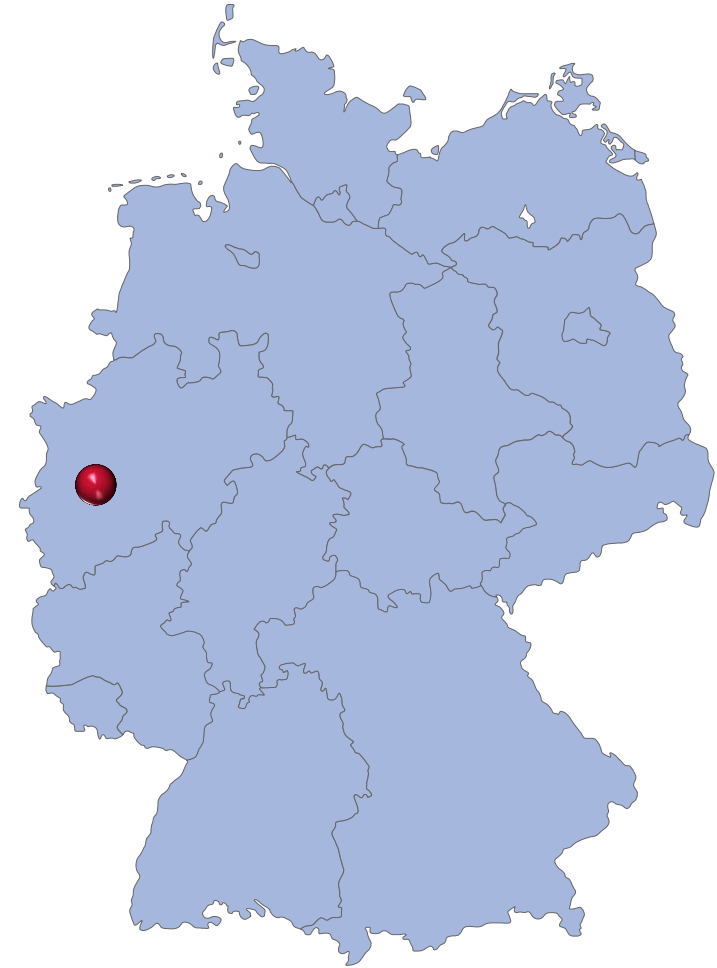

Our working environment is team-oriented and cooperative. Your future colleagues are not only highly qualified, but also a bunch of great people and pleasant to work with.

Our office is in Bonn, but we do not have fixed office days. Thus, you can choose your place of residence within Europe and our team is well distributed between Hamburg and Munich, Berlin and Saarland, with colleagues dialling in from Scotland or Portugal. Although, it is certainly helpful to choose a location from which you are well connected to public transport to ease the weekly commute to the client.

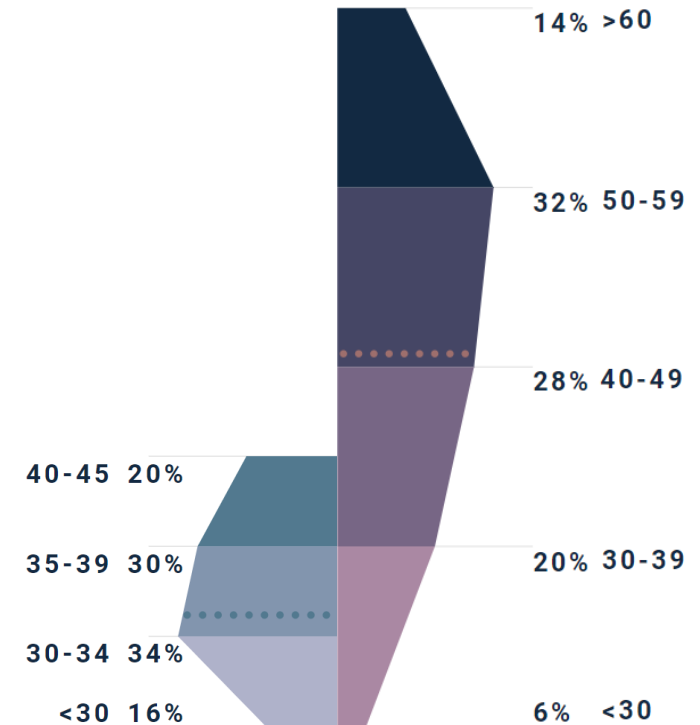

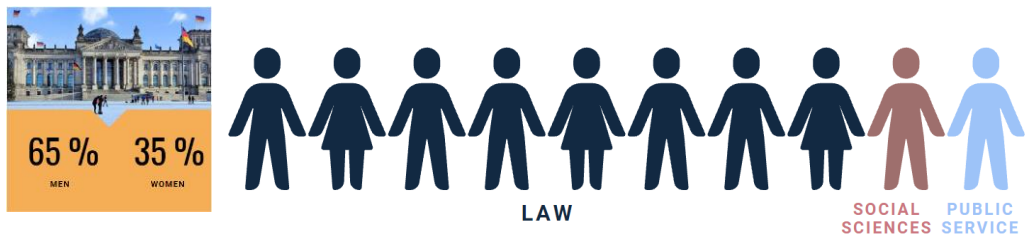

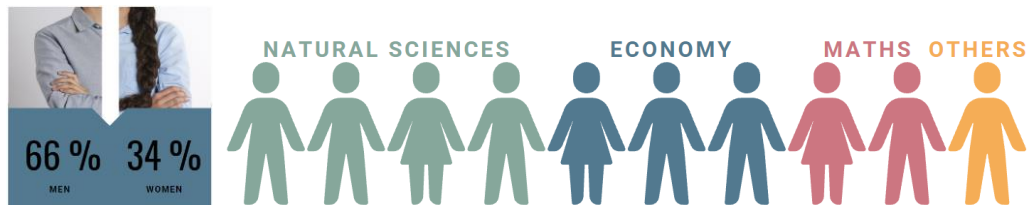

Your salary reflects your outstanding academic achievements. Your contribution to our company's success will be adequately rewarded.

You will benefit from an extensive benefits package we make available to our team.

As analytical people, with company office in Bonn, not far from former German Bundestag, we analysed how comparable we are to the newly elected parliament.

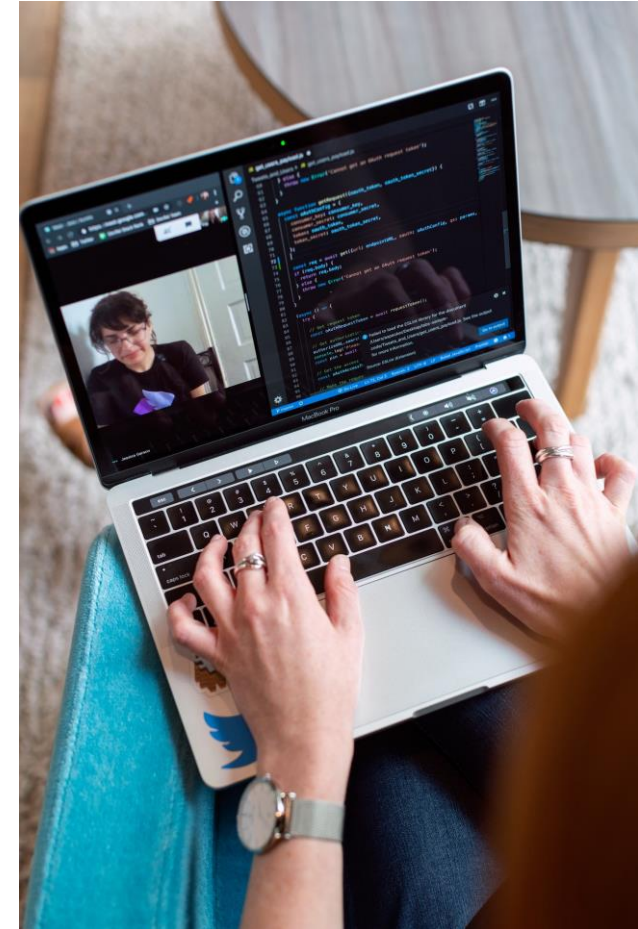

We share gender ratio, but our team have very different academic background and is much younger.

You are studying Computer Science, Mathematics, Natural Sciences, Business, Economics or a similar subject. You want to get out in the field while studying. We are offering internship positions with a minimal duration of six weeks around the year.

For us, internships are a valuable learning opportunity for you, and it is our responsibility to find challenging tasks and provide realistic insights into the life of a Management Consultant. Many of our former interns returned after graduation or as working students and are now valuable team members.

Following my internship, I am happy that I could keep working at Analysys Mason as a working student while pursuing my master studies in psychology. I gain insights into the fascinating world of consultancy in the telecommunication industry. My challenging tasks demand analytic, creative as well as communicative skills. I am more than happy to benefit from the enriching work environment which is being offered by my exceptionally skilled and passionate colleagues.

Max Reimann, Working Student

My internship at Analysys Mason was a nice experience to get first insights into the consulting world outside of university. So, I was glad that I could return to Analysys Mason as a working student while pursuing my master degree in mathematics.

Being a working student, I help defining and monitoring processes at a financial institution. I learn new things every day and am delighted to do so in this quirky and flexible team.

Richard Restetzki, Working Student

You are very welcome to come and visit our event team to discuss, ask, inquire, inform, chat, challenge, ...

... with our team of consultants and HR Manager.

We are looking forward to meeting you!
