

About us

AFS Group is a European financial service provider specialised as a multi-channel intermediary in the Wholesale Financial, and Renewable Energy Sector. We are located in the historical Stock Exchange of Amsterdam. Besides our main office in Amsterdam we cover our international clientele of corporates, governments, utilities and financial institutions from Frankfurt, Zurich and London.

With our long history of 170 years in brokerage services we have now more than 130 employees with more than 20 nationalities who are dedicated and motivated to succeed in this business. Our greatest success is collaboration in an ambitious and entrepreneurial environment.

We've divided our services over different departments, which you can find below.

Our departments:

- AFS Energy
- AFS Interest
- AFS Execution services
- AFS E-venues

Financial services

Execution Services

AFS Execution Services acts as an independent Agency-only Multi Asset execution broker/intermediary, acting only on instructions received from clients. Buy-side clients like Private Banks, Asset Managers, Pension Funds, Insurers, Fund Managers, Family Offices and High-Net-Worth Individuals are our core focus. Our target is to provide our customers with a first-class full chain electronic execution experience in financial and/or renewable instruments.

E-venues

E-Venues is a licensed Multi Trading Facility ('MTF'). It offers electronic platform solutions to a variety of clients. The first platform we went live with is called 'AFS Blue'. AFS Blue connects issuers and investors in the primary and secondary markets for debt instruments in amongst others the following sectors; European local and regional governments, housing association and guaranteed export finance. In close collaboration with our internal development team we work on new innovative platforms to be launched.

Financial services

Fixed Income

The Fixed Income Desk acts as a 'principal', trading in Fixed Income products on behalf of local and international institutional investors and other financial institutions. The Fixed Income Desk serves all parts of the fixed income markets: from bonds issued by Governments, Financial institutions and Corporates to structured interest products and private loans.

Money Market

This department has a broad and widespread client base of (Private) Banking Institutions, Central Banks, Cooperative (building) Societies, mid and large Corporations, Insurance companies, Multinationals, Pension Funds, Utilities and various (local and semi) government bodies. We are particularly proud of serving more than 10 Ministries of Finance in Europe.

AFS Energy

AFS Energy is an intermediary in environmental commodities. Since 2012, AFS has been a leading commodity house concentrated on the renewable energy market. We are a commercial business where we sell and buy renewable energy products for organizations that want to be more greener and sustainable. Our young and rapidly growing desk is providing organizations advice and updates on regulations. We advise our clients on the products that best fit their needs through tailor-made solutions.

AFS Energy is in direct contact with regulatory councils and governmental agencies across Europe. Renewable energy markets are in continuous change and fast growing. In order to keep up with the market, we generate market insights to optimise the sustainability strategy.

Beursplein 5, 1012 JW Amsterdam
